

Matrix owns cutting-edge Small Business Innovation Research (SBIR) technology powered by trusted COTS products—fully authorized for deployment and enhanced with built-in geospatial intelligence to give you a decisive edge. We tailor our technology to your mission, deploy it at scale quickly, and for a fraction of the cost. Best of all—you own and control the solution from day one.

- Do you struggle with collecting data in a consistent manner from distributed teams or locations?
- Is your organization spending too much time stitching together tools and data sources?
- Are decision-makers flying blind due to outdated or incomplete situational awareness?
- Do you need flexible digital tools adapted to your mission set that you own, operate and maintain?

We provide intelligent, dependable solutions tailored to the software platforms you already rely on—designed to simplify decision-making and drive your mission forward.

- Operational Dashboarding
- AI & Machine Learning
- Digital Twin

Mission-Focused Solutions, Powered by SBIR

Matrix has an awarded SBIR agreement (FA864925P0274) under AFWERX topic AFX255-DPCS01.

This SBIR agreement affords Matrix the right to enter into **sole-source** Phase III agreements for related work that derives from, extends, or logically concludes efforts associated with the original agreement (15 USC 638(r)(4)). This authority allows Matrix to be a streamlined solution to resolve complex challenges with speed, precision, and cost-efficiency, while you stay focused on mission-critical priorities.

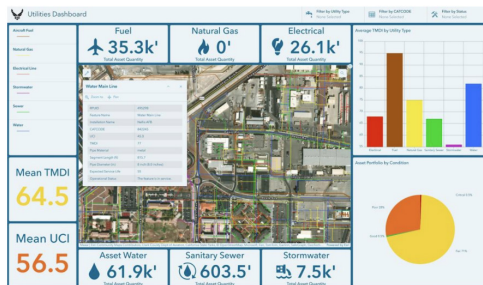

Reference the AFWERX guide for more info:

<https://afwerx.com/divisions/ventures/sbir-sttr-program-overview/>

Agencies are permitted—and encouraged—to engage with the SBIR awardee during acquisition planning.

Early communication helps inform the development of requirements documents that accurately reflects the SBIR solution and intended mission impact.

Steps to Solve Your Challenges:

- 1 Reach out to Matrix to verify your requirements align with our adaptive SBIR technology framework.
- 2 Collaborate with Matrix to refine your problem statement, clarify desired outcomes, and zero in on a solution.
- 3 Develop scope, schedule, and deliverables through a Performance Work Statement (PWS) or Statement of Work (SOW).
- 4 Coordinate with procurement to complete a Determination and Findings (D&F) or MFR demonstrating how the Phase III contract builds on prior SBIR work which satisfied competition requirements.
- 5 Follow standard solicitation processes through contract award.
